

WWW.SCAREPRODUCTS.COM

THANK YOU FOR PURCHASING THE SCARE PRODUCTS WATER CANNON! SIMPLY FOLLOW THE STEPS TO EASILY CREATE WHAT IS SURE TO BE ONE THE MOST TALKED ABOUT EXPERIENCES IN YOUR ATTRACTION.

INSTALLATION

1. Drill a 13/16" diameter hole in desired location for firing hose, no more than 12" off the ground.
2. Place firing hose in hole, secure with provided nut.
3. Supply Water Cannon with 12v DC power.
4. Connect hand trigger to control unit.
5. Connect to an air supply.
6. Connect to a water supply.

**Optional laser trigger installation:*

1. Drill a 1" hole underneath the firing hose, and mount laser trigger.
2. Mount reflector directly across from laser trigger. (Note: turning off lights will help see the laser to determine where to mount reflector).
3. To set ON/OFF delay, remove cover of laser trigger. Increase the ON delay to desired time (OFF delay determines the delay from when the laser is triggered to when the Water Cannon fires. If set to zero it fires immediately).

NOTE:

Product is polarity sensitive. **MUST** connect **RED** positive to **RED** positive, and **BLACK** negative to **BLACK** negative!

OPERATION

1. Turn Water Cannon ON.
2. Adjust the air flow via the knob marked "Air" (The air knob controls the volume of air released when triggered).
3. Adjust the water flow via knob marked "Water" (The water knob controls the amount of water released when triggered).

NEVER mount firing hose above knee level. This is to prevent Water Cannon from firing in peoples faces, which could lead to injury.

NOTE:

NEVER mount firing hose above knee level. This is to prevent Water Cannon from firing in peoples faces, which could lead to injury.
